ABOUT THE MANUFACTURER

Telox in brief

Founded in 2014, Telox develops broadband push-to-talk and body-worn camera solutions for public safety, private security, utilities and transportation.

2014	80+	600,000+
Founded	Countries	Users

WHAT THE PORTFOLIO COVERS

Team communication
Cellular push-to-talk, hybrid DMR radios, MCX and private broadband.

Vehicle operations
In-vehicle LTE terminals for teams that work on the move.

Field video and evidence
Body-worn cameras, docking and evidence-management tools.

Device administration
Enrollment, configuration and remote support with SafeMDM.

DEPLOYMENT

Single station or centrally managed sites

EVIDENCE WORKFLOW

Collect recordings

Download and remove recording files automatically in standalone operation while cameras charge.

Coordinate sites

Manage evidence at one station or across multiple internet-connected stations with a central server.

Organize evidence

Automatically upload and tag recordings to simplify storage and retrieval.

ALSO IN THIS RANGE

Sentra 360 **SafeMDM**

MANAGEMENT SOFTWARE

Sentra 360

Evidence management and field operations

Sentra 360 connects field capture, data transfer, evidence management and review in a single ecosystem.

CORE CAPABILITIES

Live video and capture

4G LTE live streaming with simultaneous local and live recording.

Voice recording and history.

Evidence and workflow

Wireless cloud upload and video management.

Cloud storage, incident reporting and workflow management.

Safety and tracking

GPS tracking and geofencing.

Man-down protection, panic alerts and lone-worker tools.

Patrol and coordination

Guard patrol tools and broadcast messaging.

ALSO IN THIS RANGE

DEMS **SafeMDM**

MANAGEMENT SOFTWARE

SafeMDM

Enterprise mobile device management

SafeMDM manages smartphones, tablets and handheld terminals running iOS or Android, including company equipment and employee-owned devices.

Enroll and administer

Bulk enrollment for company and BYOD equipment through a central console.

Configure and secure

Deploy policies and configuration files. Manage security, Wi-Fi, VPN and kiosk mode.

Manage apps and updates

Administer apps and apply over-the-air upgrades.

Support devices remotely

Monitor, control and troubleshoot equipment remotely.

USE SCENARIOS

Enterprise

Education

Healthcare

Retail

Telox highlights shorter rollouts, simpler administration and lower support and maintenance effort.
